

# Leading the Future in Refrigeration Technology

## EMERSON ZX Platform Condensing Unit PRODUCT CATALOGUE

EMERSON. CONSIDER IT SOLVED.™

# *Emerson ZX platform condensing units*

Emerson Climate Technologies is pleased to offer the ZX platform refrigeration condensing units (CDU) specifically designed for medium temperature (MT), digital modulated variable capacity medium temperature (MT) and low temperature (LT) refrigeration. Emerson's CDU range comes with unique features and applies its advanced and patented scroll technologies that redefine the standards of efficiency and reliability for this category of products.

ZX series CDU has been highly successful in the Asian market and enjoys proven success with its energy savings and customer-friendly electronic features. ZX CDU's have been applied by several well known end-users and chain retailers throughout Asia. The ZX platform is also gaining wider acceptance in the global market and specific variants have been developed and exported to the USA, European and Middle East markets.

The fixed capacity ZX platform CDUs come with Emerson Climate Technologies' highly successful "E2 Controller". E2 controller provides real-time monitoring of compressor operating conditions and initiates actions to keep the compressor within the safe zone. When fault conditions are detected, the controller initiates temporary shutdowns and sends specific warning signals to facilitate service. In the event of continued errors, the controller will shutdown the unit thereby preventing costly equipment failure and send alarm signals. The controller is also designed to activate an external telephone dialer to be notified on a preset telephone number. This feature can also be used to automatically start a back-up unit in critical applications.

The Digital modulated variable capacity ZXD MT CDU comes with Emerson Climate Technologies proven "EC2-552" controller. The EC2 controller provides real time load estimation and controls the delivered capacity by changing the Digital modulation rate. The controller also provides the basic protection including the high discharge temperature trip. The controller also displays the suction pressure, saturated evaporating temperature based on the suction pressure, modulation rate and discharge line temperature. The controller has manual and web enabled interface for setting up the initial parameters required to be set up.

Emerson's highly successful Copeland® brand scroll compressors drive the high efficiency of the ZX platform of CDUs. Over 50 millions Copeland® brand scroll compressors sold across the globe stand testimony to the extraordinary confidence and success in our scroll technology.

However, we have not rested on these laurels alone when it comes to our ZX platform CDUs.

The ZX range of MT CDUs benefits from patented scroll suction injection technology. This allows the scroll compressor to provide a superior MT envelope.

ZXD range of Digital modulated MT CDUs benefit from the patented Digital scroll technology. This allows a simple and very reliable variable capacity system at MT envelope.

ZX LT CDU applies vapor injection technology. This allows an economizer cycle on scroll compressors. Vapor injection significantly improves the LT operational efficiency and extends the LT envelope.

Emerson Climate Technologies continues to focus on the ZX CDU platform to develop discernibly superior solutions for the demanding refrigeration market.

**Note:** Based on the return gas temperature of 5°C.

Power include condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

# ZX low temperature series

Capacity And Power (kW) At 50Hz - TFD

R404A/R507

**Note:** Based on the return gas temperature of 5°C.

Power include condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

R404A/R507

# Emerson ZX platform condensing units

## ZX Platform Fixed Capacity CDU Diagnostics (Medium and Low Temperature)

- Compressor Reverse Rotation
- Compressor Over Current
- Compressor Internal Motor Protector Trip
- Discharge Gas Over Heat
- High Pressure Cut Out
- Low Pressure Cut Out (only on MT series)
- Refrigerant Flood Back
- Compressor Minimum Off Time
- Internal Thermal Sensor Failure

Diagnostic Digital Messaging

Built-in ZX Platform Controller

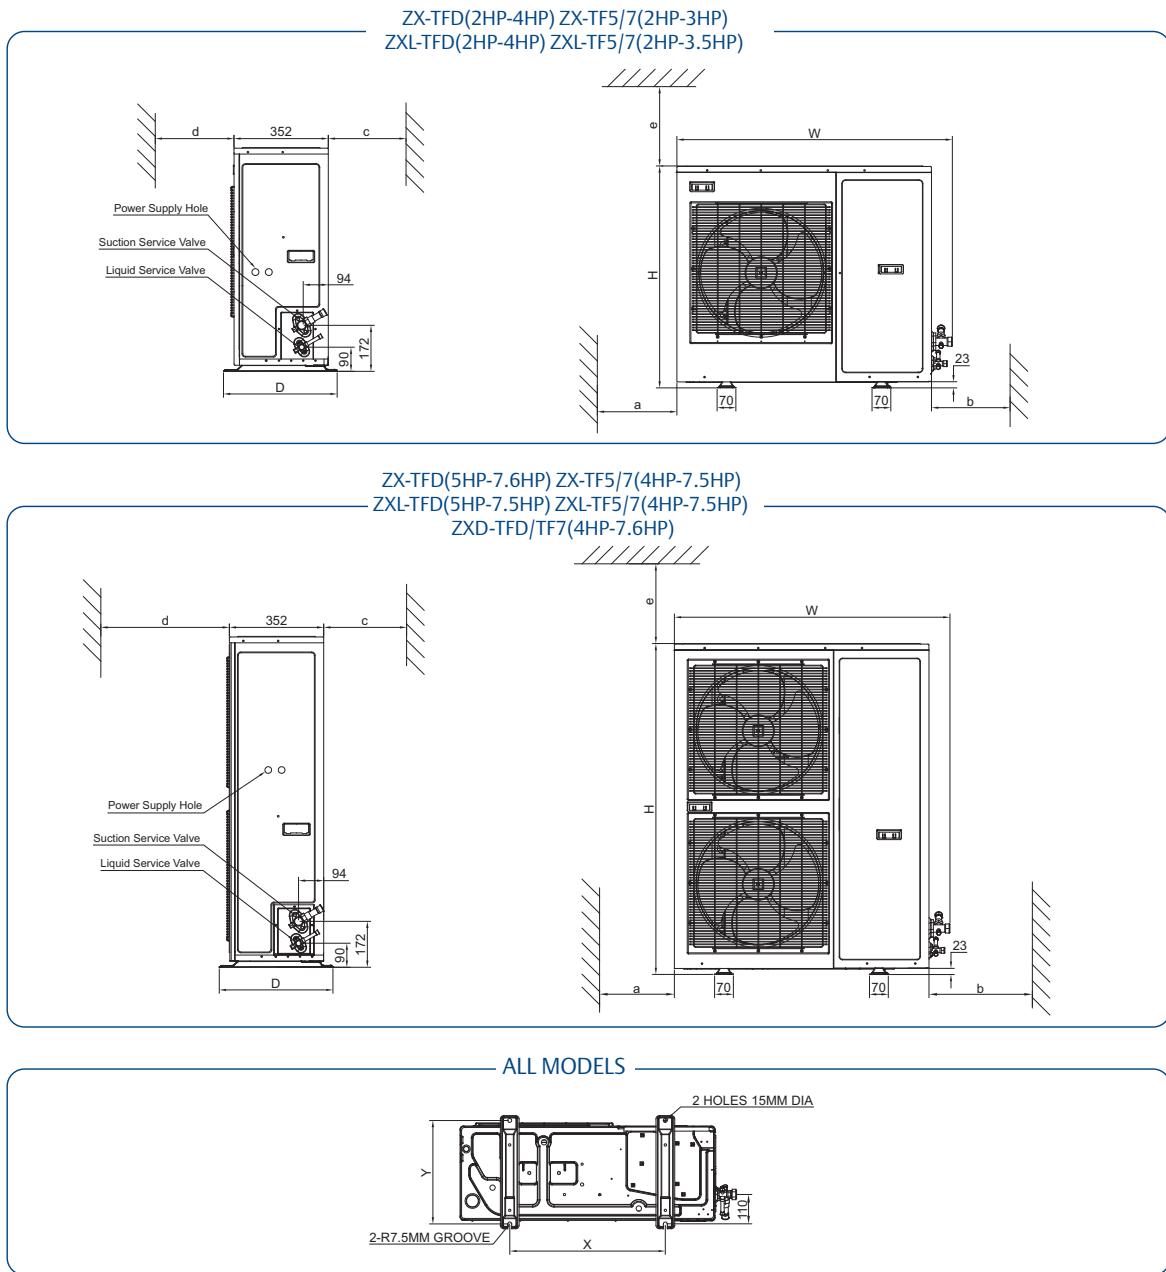

## ZX Digital CDU Electronics Display & Alarm Features (Medium Temperature)

- Compressor Status
- Suction Pressure
- Saturated Suction Temperature
- Digital Modulation Rate
- Discharge Temperature
- Low Pressure Alarm
- Discharge Temperature Alarm

# Emerson ZX platform condensing units
